

# Shelves for Exterior and Interior Dutch Doors

Scan for  
More Information

Dutch doors are a popular design trend for both exterior and interior doors. If you are considering a dutch door for your space, consider a shelf to provide a stylish and practical touch. Shelves are available in any type of wood and any width to match your door. Dutch shelf installation can be a do-it-yourself project or you can order your door from your Authorized Dealer with the shelf already installed.

## Interior Dutch Door Shelves

These two options are to be installed on top of the bottom section of an interior door that has a straight dutch cut. Make sure to indicate the width and thickness of the door when ordering.

### 9524

For interior 1-3/8" or 1-3/4" dutch doors with straight dutch cut 3/4" thick, 8-3/4" deep. Make sure to specify door thickness and width.

### 9525

For interior 1-3/8" or 1-3/4" dutch doors with straight dutch cut 3/4" thick, 4-3/8" or 4-3/4" deep. Make sure to specify door thickness and width.

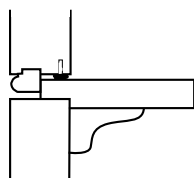

## Exterior Dutch Door Shelf

This option is to be installed on top of the bottom section of an exterior door. The bottom of the shelf is pre-grooved to sit snugly on the bottom half of the door and the predrilled brackets support the shelf (screws not included – requires four 1-1/4" long #6 wood screws). Make sure to indicate the width and thickness of the door as well as the type of dutch cut when ordering. Please note: the bottom section will have a straight dutch cut to accept this shelf. And to create a weathertight seal, make sure the top section has either a Dutch & Rabbet with Dado cut or a Dutch & Rabbet with Kerf cut.

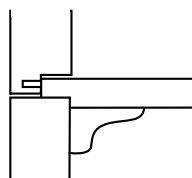

### 9526

For exterior 1-3/4" and 2-1/4" dutch doors, 3/4" thick, 7-1/8" deep, brackets predrilled. Make sure to specify door thickness, door width and type of dutch cut (screws not included – requires four 1-1/4" long #6 wood screws).
